

# Weather Plan

## Dane County Fair

The AEC Event Supervisor on duty will monitor the Doppler weather radar to follow any inclement weather advisories and advise DCF accordingly, deciding the best course of action necessary.

### **THUNDERSTORMS**

1. DCF plans to shut down the Carnival and outside vendors in order to get people to head indoors (Pavilions 1 & 2, Exhibition Hall or Arena Building) when heavy rains and/or winds occur. DCF will continue to coordinate with AEC.
2. DCF plans to alert events in each building of impending conditions. Attendees can stay in the Pavilions, Arena Building or Exhibition Hall or in case of an emergency move to the Coliseum-Arena Level, in heavy rains or wind. Animals will remain in stalling areas.

### **TORNADO WARNINGS**

AEC will monitor Doppler radar to determine movement of potential tornado alerts/sightings and advise DCF accordingly of what action will be taken.

The Coliseum-Arena level is the best place for refuge in a tornado. All Exhibitors housed in the Pavilions shall go to the Coliseum-Arena level for refuge from tornadoes and high winds. All animals must remain in their stalling area.

Mendota Rooms 1-8 are the best place in the Exhibition Hall for refuge from tornados and high winds.
