

Weather Plan

Dane County Fair

AEC and DCF Staff will monitor the Doppler weather radar to follow any inclement weather advisories and advise accordingly, deciding the best course of action necessary.

IN THE EVENT OF A THUNDERSTORM:

1. DCF will shut down the Carnival and outside vendors in order to get people to head indoors (Pavilions 1 & 2, Exhibition Hall or Arena Building) when heavy rains and/or winds occur.
2. DCF will alert events in each building of impending conditions. Attendees can stay in the Pavilions, Arena Building or Exhibition Hall. Animals will remain in stalling areas.

IN THE EVENT OF A TORNADO:

AEC will monitor Doppler radar to determine movement of potential tornado alerts/sightings and advise DCF accordingly of what action will be taken.

All Exhibitors housed in the Pavilions and Arena Building shall go to the Coliseum-Arena level for refuge from tornadoes and high winds. All animals must remain in their stalling area.

All Exhibitors housed in the Exhibition Hall shall go to Mendota Rooms 1-8 for refuge from tornados and high winds.
